Description

Product details

Side dishes

Sloviol R - polyvinyl alcohol 16% (PVA) - is used in non-toxic water-dilutable transparent volatile paints or as an adhesive for paper. Since it does not contain solvents, it is also suitable for children.

CAS: 9002-89-5, ES: 209-183-3,
1 package = 1 kg, so enter e.g. 3 packages and you will receive 3 kg poured in the corresponding package.

Although it is a liquid, we sell it by weight as it is easier to fill.

Quality specifications, parameters:

Dry matter: 16 +/- 1.5 wt. %

Viscosity of 4% water solution: 9 – 13 mPa.s

Acid number: 4.5 max. mg KOH.g⁻¹

Saponification number: 130 +/- 15 mg KOH.g⁻¹

Specific conductivity: max. 350 m S.cm⁻¹
